

Awnings

2024

 **Frankana Freiko**®

Everything for Caravan | Camping | Leisure

Dear campers,

We are pleased to present our wide range of tents to you! In the early days of camping, we were accompanied by simple tents and unspoilt nature. But over the course of time, camping as a form of holiday has evolved. Today, we would like to introduce you to a range of tents that will make your camping trips even more comfortable.

Awnings have become almost indispensable and transform your vehicle into a cosy retreat in no time at all. Whether you prefer a classic caravan awning or are interested in partial and storage tents, roof tents, sun canopies or accessories – we have the right awning for every taste and need.

Take a look at our extensive range on the following pages and let yourself be inspired.

Regardless of your choice of model, we would like to wish you lots of fun and relaxation on your camping holiday! Enjoy nature and let yourself be accompanied by our high-quality tent accessories.

Sun Canopy Stella

Why do we produce our own awnings?

Frankana Freiko has been offering its own awnings for years. Our plan was to work hand in hand with renowned tent manufacturers to produce awnings that offer you, our customer, added value. We have achieved both with our Frankana Freiko awning collection.

Feedback from our specialist trade partners and from you, dear customer, helps us to be first-class down to the last detail.

The result are awnings that impress with both quality and functionality – at an excellent price-performance ratio. Be it the choice of tent fabric, the material of the poles or the design – we always find a good way.

One example: our sun canopy Stella. You can find it on pages 4 and 5, with a gable for an even nicer appearance and a significantly larger shaded area. Coloured side sections are optionally available to allow for individuality. The side sections, which are equipped with window film and mosquito nets, ensure optimum ventilation.

Convince yourself of the advantages of the Frankana Freiko awning collection when it comes to quality and price.

Find the right awning
for your motorhome, your caravan
or your van.

Information

An awning that is pulled in over the entire length of the caravan is suitable for travelling, seasonal or permanent camping and significantly increases the living space. The piping (attached to the tent) is pulled into the existing piping rail on the caravan and the awning is thus connected to the caravan. Due to the time-consuming setup, it is recommended for longer stays. For all spontaneous campers who only want to spend a few days on a campsite, so-called travel awnings are particularly suitable.

Travel awnings

The classic travel awning is suitable for short holiday trips and not for long-term use. Travel awnings are light and easy to set up. They also have a small pack size and low weight.

UV radiation and extreme weather conditions place ever greater strains on materials and equipment. Good sun protection is therefore the be-all and end-all of a good awning.

Covered zips are more leakproof and last longer. Welded roof seams ensure that the roof is also reliably leakproof. Both quality features are definitely worth the effort.

Travel Awning Galaxy 2.0

Seasonal and all-season awnings

Seasonal and all-season awnings are probably the most elaborate types of awnings. PVC-coated material is used on both sides.

The material must be tear- and abrasion-resistant to meet the requirements.

Condensation occurs both with material coated on one side and on both sides. However, if an awning is only coated on one side, moisture is absorbed into the fabric.

The formation of condensation depends on the temperature differences between the inside and

All-Season Awning Grönland

Awnings

Individually expand your living space!

the outside of the tent, the ventilation, the ground sealing and the weather conditions. However, only double-sided coatings are suitable for permanent use.

Tents for seasonal or year-round use are usually equipped with additional features, such as double draught skirts and window flaps. Due to the use of robust materials, these awnings weigh more and have a larger pack size.

Seasonal Awning Prestige

Interesting facts

How is the awning attached?

There is usually a piping rail on the vehicle. This is an aluminium or plastic profile that holds the piping on the awning. Piping rails can also be retrofitted and look like a "C" in cross-section. The bead or the piping is inserted into the piping rail.

There is also a piping rail on the awning side at the bottom of the vehicle. The windbreak or mud flap is inserted horizontally here. This means that this side of the awning can also be made windproof.

Pulling the awning into the piping rail

First check your rail for sharp edges! To ensure that the piping slides better into the rail, we recommend spraying it with the draw-in spray Zip-Fit (450/305).

Of course, the awning should be secured with the tensioning material and pegs that are often supplied. A storm strap set also gives the awning more stability in the next storm. In most cases, the awnings are already fitted with the appropriate devices so that the corresponding storm strap set can be easily attached.

Distance to the ground – draught skirt

The distance from the lower edge of the fabric to the ground can vary from caravan to caravan and depending on the ground conditions. The draught skirt should be at least high enough to allow the elasticated guy ropes to be tensioned. The rest of the draught skirt lies on the ground. The groundsheet and carpet can then be laid on top.

Choosing the right awning size

Measure the overall dimensions of your caravan on a level surface when the vehicle is stationary by running a cord (A) through the piping rail back to the ground (B). Based on the measured circumference, you will then find the right size for your caravan, motor-home or van.

More space thanks to sleeping cabins!

Create a sleeping area in your freestanding awning quickly and easily with the optionally available inner tent. It can be easily attached using hooks and offers space for up to two people. Ideal for guests, children who want more privacy or anyone who prefers to sleep outside.

The right poles!

Pole types: air tube, steel, aluminium, fibreglass.

For the roof poles, awning eyelets are required, some of which still need to be attached to the vehicle wall. Some awnings are equipped with a second piping for attaching these eyelets. This eliminates the need to fit them to the vehicle.

What is the veranda effect?

A veranda effect is achieved in the awning when the windows and doors of the front wall can be folded down completely. It provides fresh air and warm sunlight in the awning. Veranda poles are usually available as accessories.

from 485.00

Stella

Tent depth: 240 cm

 Please order the side walls, the front wall and the poles separately!

 Flexibly expandable!

-  **Advantages**
- Individually extendable
 - Side walls in 2 colours
 - Windbreak and sun protection

 More privacy thanks to the optionally available front and side walls!

Turn your sun canopy into a nice awning.

■ without poles

■ 100 % PES polyester, with PU coating

+ You will find additional accessories from page 90 on.

Stella

The appealing sun canopy protects against the oppressive heat at lunchtime and creates a comfortable place in the shade where you can read, eat, or just relax. Just order the side walls in your favourite colour to create a nice windbreak with large transparent film windows (incl. gauze).

Roof: with sewn-in gable; with zips to attach the front and side walls. SHS piping to attach the no-screw Vario Clip elements.

Material: roof exterior made of PVC-coated polyester fabric; front and side walls made of trilltex fabric, PU-coated on one side; windows made of a high-quality film with high UV stability.

Tensioning: possible from the inside with flexible tensioning straps; external mud flap

with eyelets. Attachment of the optional storm strap over the pole spike.

Please order side walls, front wall and poles separately!

When using basic poles, we recommend two additional aluminium roof poles from size 11 and two additional storm poles from size 13 (ø 25 mm aluminium).

Palermo Air

Mounting height: 180 – 220 cm

Tent depth: 270 cm

✓ Advantages

Small pack size

Specially for caravans with lifting roof

Quick and easy to set up

Perfect for caravans with lifting roof,
e.g. Hymer Eriba

blackout for more privacy

+ Accessories

💡 Create an additional sleeping space for two people in your awning

Palermo Air

EuroTrail

The inflatable caravan tent Palermo Air was specially developed for caravans with a lifting roof (e.g. Hymer Eriba Touring models except for model Puk) and a connection height of 180 – 220 cm. Thanks to the air tube system, it is quick and easy to set up. The living space offers plenty of room for a table and chairs and other camping equipment. The supplied stabilising tubes are inserted against the ceiling for a taut roof and additional wind stability. Two closable mesh ventilation windows under the canopy provide permanent ventilation. The canopy itself provides shade and protects you from rain when entering the tent. The tent has an additional entrance door on both sides with large windows with covers and is also equipped with GRP stabilisation tubes and support poles.

Front wall: with large windows with covers. Can be opened from the right and left side and thus used as an entrance door. Can be completely removed with a zip. The additional mesh door provides ventilation and protects against insects.

Roof material: 210D Ripstop Oxford polyester > 5000 mm

Wall material: 210D Ripstop polyester > 3000 mm

Poles: Airtube

Material: 100 % PE polyethylene

Barcelona

Tent depth: 240 cm

 **Advantages**

- Perfect price-performance ratio
- Ideal for aerodynamic vehicles
- Optionally extendable

✓ Can also be used as a sun canopy.

■ without poles ■ 100 % PES polyester

i Information

Suitable for vehicles with an aerodynamic design (KNAUS, Bürstner, Eifelland, etc.).

Barcelona

The perfect awning for all price-conscious campers is equipped with all-round storm tensioning options. Can be tensioned on the inside with flexible tensioning ladders. Thanks to the included double piping, you do not need screws to attach the awning to your caravan.

Front wall: consisting of 2 pieces, detachable, even from the roof (veranda effect). Entrance door size 4 with two windows and sizes 5 – 9 with three windows in the front wall.

Side walls: equipped with gauze/ventilation windows and can be closed via foil window flaps. The side wall door can be rolled up to the side. Using double piping, you can add an extension to the right side. The side wall can remain as a partition wall.

Roof: made of trevira fabric, PVC-coated on both sides. Welded roof seams.

Material: completely made of high-quality PVC coated on both sides, weatherproof and rinseable.

Poles (not included): Need to be ordered separately. From size 5 on, we recommend two storm poles and two roof supporting poles.

Scope of delivery: tensioning material, mud flap, curtains, wheel case cover, transport bag, tent

Westfield
PLUTO XL 2.0

 spacious interior

 Enjoy a great view thanks to the large windows!

 Airtube  100 % PES polyester, double-sided PU coating

Pluto XL 2.0

Westfield
Top Quality Concept

With a depth of 300 cm, the inflatable awning Pluto XL is incredibly spacious! It is pulled completely into the piping rail of your caravan. This means that all windows, doors and service hatches can be opened easily and that the sides of your caravan are sealed against wind and weather. Thanks to the high-quality HydroTech® CottonTouch material, the permanent ventilation and the tinted windows, the temperature inside the awning will be pleasant even on hot summer days. The removable front and side walls are equipped with mosquito nets and can be used as needed. The large panorama windows ensure that you always have a great view and optimal lighting conditions. Thanks to the AAS air technology, the inflatable awning Pluto XL is especially quick and easy to set up. The new model is additionally equipped with a connection for the sun canopy Canopy Shady Pro.

Front wall: removable, with mosquito net and panorama window. Can be used as needed.

Poles: Advanced Air System® (AAS)

Side walls: removable, with mosquito nets and panorama windows. Can be used as needed.

Scope of delivery: 1 veranda pole, 2 transport bags, tensioning material, Airtube, air pump, mud flap & wheel cover with ventilation, tent

Material: HydroTech® CottonTouch 100 % polyester

 You can find a more detailed description of the sun canopy Canopy Shady Pro on page 81.

Luxor Air

Tent depth: 280 cm

- ✓ Advantages
- Fully integrated Veranda effect
 - Incl. curtains
 - All-around canopy

i Also suitable for greater mounting heights.

💡 Fresh air in your awning thanks to veranda effect.

💡 With 4 door options

✔ Can also be used as a sun canopy.

■ Airtube ■ 100 % PES polyester, with PU coating

Luxor Air

The fully integrated inflatable awning has a depth of 280 cm. Specially designed to create a large, luxurious space with plenty of daylight in front of your caravan. Weatherproof, with sealed seams and double mud flap. Optionally, the awning can be extended with an extension attached to the desired side wall.

Front wall: with covered zips for optimum protection. Transparent film windows with curtains. Windows can be folded down to form a veranda. Front walls are exchangeable. This results in four possible doors.

Transparent film windows with curtains for even more privacy.

Material: made of extra strong KlimaTex polyester fabric, PU-coated.

Side walls: with covered zips. Side walls can be completely removed and replaced thanks to a zip. This means that the ventilation windows can be placed at the front or towards the caravan.

Poles: Airtube

Scope of delivery: tensioning material, Airtube, double action pump, curtains, transport bag, tent

MADE IN GERMANY

Westfield
Top Quality Concept

The luxury inflatable awning Galaxy by Westfield TQC is made in Germany with the best European fabrics. Thanks to its design and modern shape, you will feel even more comfortable on holiday. The large windows that can be closed from the inside, the depth of 250 cm and the headroom in the awning ensure that you have a very pleasant feeling of space. The indoor climate is also optimal in any weather thanks to the high-quality AIRTEX® and TenCate® All Season materials and the many ventilation options. With the Galaxy luxury inflatable awning attached to your caravan, you are ready for your next holiday. Suitable for seasonal use.

Front wall: two parts, detachable, with door. With large panorama windows with blinds and mosquito nets.

Side walls: with large panorama windows with blinds and mosquito nets.

Material: AIRTEX® (side walls) and TenCate® (roof) All Season

Poles: Airtube (AAS)

6000 mm

You can find a more detailed description of the sun canopy Canopy Shady Pro on page 81

Extension Eris Premium

The extension Eris is quick and easy to set up and creates extra living space in your awning! No matter whether you are sleeping in it or use it as a kitchen or storage tent, Eris offers a variety of possibilities. The door and the tinted windows with privacy function create optimum light conditions and always give you a perfect view. The height of 180 cm offers headroom and leaves nothing to be desired. A double zip allows you to use the existing side wall of your inflatable awning as a partition or room divider. The supplied roof poles ensure optimum tension in the roof.

Lux

This stylish 5-piece awning in a lively and friendly colour design offers numerous equipment features and comfort at an incredible price. Versatile use, e.g. as a sun canopy, either with or without side walls. Enjoy your holiday and leisure time! Thanks to the doors in the front and side walls, you can easily enter the awning. The roof ventilation provides a pleasant indoor climate.

Front wall and side walls: can be removed. Front wall can be divided and used as a veranda. Entrance door can be rolled up. Front wall window with curtains. The canopy is equipped with hemstitches for additional poles (optional).

Side walls: with doors that can be rolled back. The right side wall is equipped with a double wind corner (advantageous for aerodynamic caravans). Large gauze windows.

Roof: with permanent and high ventilation. Equipped with rain gutter piping on both sides.

Material: roof, front and side walls are made of high-quality, PVC-coated (both sides) polyester fabric (Trevira); extremely tear-proof, rinseable and easy to clean.

Poles: not included, please order separately.

Scope of delivery: tensioning material, mud flap, curtains, wheel case cover, transport bag, tent

- Ideal for aerodynamic vehicles

💡 Completely washable and weatherproof!

■ without poles ■ double-sided PVC coating, 100 % PES polyester

Prestige

📄 Complete protection for even more privacy.

Seven-part awning for everyone who wants more. Exterior mud flap, tensioning on the inside, storm straps at the front wall. Can also be used as a sun canopy if you remove the front and side walls. Covered zips. Also suitable for aerodynamic vehicles. With over-welded roof seam as standard.

Front wall: consisting of 4 parts, removable and can be rolled up to form a veranda. Window segments with non-transparent PVC flaps. Incl. curtains in matching design. The front door can be positioned either on the left or on the right.

Side walls: are removable. Gauze/foil window with translucent embossed foil flap. One entrance door each.

Roof: made of one element, with reinforced pole eyelets, SHS roof piping with fabric sheath, welded roof seam and closable roof ventilation, canopy depth 18 cm.

Material: The tent is completely made of washable, weatherproof polyester fabric with PVC coating on both sides. Absolutely leakproof, very easy to clean (even from spore stains) and rot-proof. Very high tear resistance.

Poles (not included): Please order separately. We recommend 2 additional roof hook poles (610/043) and 2 storm poles (610/044).

Scope of delivery: tensioning material, mud flap, wheel case cover, SHS piping, curtains (front wall), transport bag, tent

Grönland

+ Accessories

The ideal awning for permanent campers. Under every window, there are storm straps on the outside and hemstitches on the inside. The tent has three roof channels and a special piping for screwless support brackets (brackets not included) and a lateral piping for a rain gutter. A Vario corner ensures that the awning perfectly adapts to your caravan. The double draught skirt with sewed on piping between the mud flaps makes it possible to move special tensioning hooks.

Front wall: 4 pcs. (6 pcs. from size 11), all parts are interchangeable. Can be folded down to form a veranda. Entrance (80 cm) can be rolled up. Vertical Velcro channels. Closable top ventilation.

Side walls: 2 pcs., all parts are interchangeable (1 x door, 3 x windows), window 1/2 gauze, 1/2 film, with dark cover. Veranda option. Vertical Velcro channels.

Roof: with three roof channels for roof poles with Velcro tape. Hemstitches in the canopy for canopy tensioning poles.

Material: rinseable and easy-to-clean PVC

Poles: ø 32 mm steel poles consisting of: 5 roof poles, 5 pitching poles, canopy poles.

Scope of delivery: ø 32 mm steel poles, tensioning material, mud flap, curtains, transport bag, tent

Storm Package

Simply pull it into the awning's hemstitches. That way, the awning walls are less compressed by the wind and the awning stays upright. Thanks to four additional roof poles, the distance between the poles is halved. This reduces the risk of water accumulating in heavy rain.

Scope of delivery: ø 25 mm and 32 mm steel roof poles and clamps for ø 32 mm steel poles.

 Our long-time favourite
with permanent campers!

from 2,655.00

Feldberg DC

Tent depth: 240 cm

Advantages

- Easy to clean tarpaulin fabric
- Incl. poles
- Incl. front wall curtains

material made of wipeable, easy-to-clean PVC tarpaulin fabric

■ Steel ■ double-sided PVC coating, 100 % PES polyester

Feldberg DC

The 7-part awning, ideal for permanent campers, is characterised by extensive features and excellent workmanship. The tarpaulin fabric is washable and therefore easy to care for. This awning with frame is part of the Frankana Freiko tent collection and is very functional and well thought-out.

Front wall: consisting of 4 parts, removable and can be rolled away to form a veranda. Door can be rolled up. With storm flaps inside, storm tensioning bar outside and covered zips. External flaps made of tarpaulin fabric.

Side walls: completely removable. Gauze/film window with foil flap and outer flap made of tarpaulin fabric. The door can be rolled away laterally. With covered zips.

Roof: made of one piece. Roof piping with fabric sheathing for the screwless support system (SHS system). Welded gable seam, reinforced eyelets and covered gable ventilation. Hemstitch flaps in canopy, 30 cm circumferential roof overhang.

Material: Front wall, side walls and roof made of washable and easy-care PVC tarpaulin fabric.

Poles: ø 25 mm steel, consisting of: 5 roof poles, 5 support poles, frame for the roof overhang.

From size 17, we recommend 2 additional roof hook poles (610/113) and 2 storm poles (610/044).

Scope of delivery: ø 25 mm steel poles, tensioning material, mud flap, curtains, wheel case cover, transport bag, tent

✓ Protect yourself from prying eyes with all-round window flaps!

storm retainer strip

roof vent can be covered

+ Accessories

Storm Pole

Storm poles serve as an additional stabilisation for your awning. We definitely recommend them for larger tents, summer tents and all-season tents. The storm pole can be fixed anywhere between a roof support pole and the ground.

Material: steel; Dim. (ø): 25 mm; Content: 1 piece

610/044 25.50

Roof Pole with Hook

Telescopic roof pole with hook. Suitable for awnings, ridge tents, canopies and sun sails.

Material: steel; Dim. (ø): 25 mm; Content: 1 piece

Allgäu

Tent depth: 250 cm/300 cm

Mounting height: 235 – 250 cm

✓ Advantages

- Incl. rear wall
- Double draught skirt
- Incl. curtains

spacious living area

i Completely freestanding all-season awning.

■ Steel ■ 100 % PES polyester, PVC coating

Allgäu

The freestanding, weatherproof awning is entirely made of PVC. A double draught skirt with sewn-on piping allows you to move specific tensioning hooks freely. Thanks to hemstitches at the canopy and under the interior windows as well as storm retainer strips on all exterior windows, additional poles (storm poles) can be mounted. All window flaps can be closed via zip. Three-sided roof overhang approx. 25 cm and 40 cm wide overhang flap, parallel to the vehicle wall. With six pre-installed storm clips (storm straps additionally available).

Front wall: two pieces, both pieces interchangeable. Entrance door can be rolled up. A mosquito net door is optionally available (075/449). Vertical Velcro channels for further fixation of the poles as well as quick opening and closing.

Side walls: interchangeable, equipped with a closable permanent top ventilation. One side wall with large gauze windows with see-through cover and a PVC window flap above. One side wall with a laterally retractable door, gauze, see-through foil and a PVC window flap.

Storm Package Allgäu

Stabilises your all-season tent, even in windy conditions. With hemstitches under the inside of the window for the optional storm poles. Wind from the front and side can be absorbed better as the tent walls are less compressed. The four additional roof poles halve the distance between the poles, i.e. water cannot accumulate easily in heavy rain.

Material: steel poles 25 mm and 32 mm
075/538 399.95

from 299.00

Rain Gutter Allgäu

The high-quality aluminium rain gutter is attached to the canopy poles and ensures the controlled draining of rainwater from the pent roof.

Scope of delivery: rain gutter, connector and clamps.

Different types of tent poles

Interesting facts

Determining the size for partial tents

The length of the partial tent is calculated from the length of the piping rail. Measure the length of the piping rail along the caravan roof with a cord (A to B). This will give you the maximum length of the partial tent.

The attachment height of a caravan is the distance from the ground to the piping rail (C).

Tent poles made of steel

Tubular steel poles are recommended for permanent and winter camping, as the material guarantees a high level of stability. This is necessary in winter to ensure sufficient stability even when it snows.

These poles usually have a diameter of 22 to 25 millimetres. For regions with very strong winds or storms, however, some manufacturers also offer tent poles made of galvanised steel with a diameter of 32 millimetres.

Steel poles are heavier than aluminium or GRP poles and are more susceptible to corrosion caused by moisture.

Tent poles made of fibreglass (GRP)

These poles are made of epoxy resin and glass fibres. They are robust and very light at the same time. When it comes to awnings, fibreglass poles are sometimes used in the roof arch.

Fibreglass poles are very strong and have a long service life. They are also lighter than steel poles.

Tent poles made of aluminium

The significant weight advantage over steel plays a major role when it comes to aluminium poles. A 28 mm aluminium pole weighs only about half as much as a 25 mm steel pole. This enormous saving is a major advantage for holiday campers. Another advantage: aluminium does not rust or corrode.

However, if the tent is set up in an area with extreme wind and weather, you should avoid aluminium and use steel instead. You should also reinforce these steel poles with storm poles.

Inflatable poles

Inflatable poles are inflated quickly and easily using an air pump. The air is pumped into the air tubes using a hand pump or a compressor, which sets up the tent.

Very suitable for short-term camping and frequent changes of location.

Information

Partial tents do not cover the entire length of the caravan. This makes them independent of the overall dimensions of the caravan. They are initially set up in the same way as larger tents: the tent piping is simply pulled into the piping rail on the roof and, if required, to the left or right.

With a partial tent, however, you are much more flexible, as it fits on different vehicles and can be attached in the centre as well as on the right or left. Please take care that windows and openings are not covered.

Partial tents are optimally adapted to the respective purpose. The quick setup is particularly advantageous for short trips or winter camping. Winter campers also benefit from the shallow tent depth as the resulting steeper roof surface allows snow to slide off easily.

Be it a classic pole tent, an inflatable awning or a van awning, the right choice creates the basis for a successful holiday.

Partial tents with poles

A partial tent with poles is the classic way to create additional space in front of your caravan. The poles are stable and robust and made of steel, aluminium, Duratec fibreglass or other materials (e.g. carbon), depending on the type of tent.

Inflatable partial tents

With an inflatable partial tent, you can create more space in no time at all and enjoy your holiday right from the start. These awnings fit perfectly onto your caravan and are therefore indispensable companions on a round trip. As they can be set up and taken down quickly, they are also suitable for motorhomes.

The variety of sizes, styles and fabrics ensures the greatest possible comfort for every holiday-maker – no matter the weather. Pay attention to the mounting height!

Information

HydroTech® CottonTouch

HydroTech® CottonTouch is a particularly high-quality and extremely easy-to-clean spinneret coloured material with a polyurethane coating on the outside and inside. It not only offers a very high-quality feel, but also outstanding UV resistance.

HydroTech® CottonTouch is also characterised by its durability and was specially developed for use and requirements in the caravanning sector.

Compared to cotton blend fabrics, it retains its shape at all times, even in changing weather and temperature conditions.

■ Airtube ■ 100 % PES polyester, double-sided PU coating

Vega 2.0

The inflatable awning Vega is perfect for those who travel a lot and change location often as it can be set up and taken down quickly. Thanks to the tent depth of 250 cm, the inside of the tent is very spacious. The air tubes are designed in such a way that you can stand upright and can optimally use the space. The large panorama windows create a great sense of space. Thanks to the included gauze element, it is perfect for warm weather, because it provides shade, insects stay outside and you can enjoy a pleasant temperature inside the tent. The new model is additionally equipped with a connection for the sun canopy Canopy Shady Pro.

Tessin

Tent depth: 150 cm = 180 cm

Mounting height: 235 – 255 cm

Advantages

- Perfect for winter camping
- Incl. curtains
- Large window front

The tent for the entire year.

■ Steel ■ 100 % PES polyester

Tessin

You love camping in winter and need an entrance gateway for your winter sports equipment? Then Tessin is exactly what you have been looking for! You will be fascinated by the robust materials as well as its excellent workmanship. Look forward to your next skiing holidays. Roof, front and side walls are made of a double-coated, washable polyester fabric. The rear tent height is adjustable with guy ropes.

Front wall and side walls: outer mud flaps with eyelets at the important points. Side entrance with high, arched zip.

Material: 100 % polyester

Poles: ø 25 mm steel

Front wall: with large windows and curtains. Tensioning triangles integrated into the front wall.

Scope of delivery: tensioning material, pressure pad, pressure poles, pressure beads, curtains, no-screw brackets, poles, transport bag, tent

275	275 x 180 cm	23 kg	075/032	821.00

Incl. poles and curtains.

Expand your living space in front of or behind your van or motorhome.

Van awnings are suitable for beginners. Usually without a solid floor and equipped with a low hydrostatic head, they are ideal for your summer holiday. Van awnings with air tubes and an inner floor offer a modern solution. Thanks to their high hydrostatic head and good ventilation, they are also ideal for use in autumn, at the seaside or in northern holiday destinations.

Most van awnings are freestanding and have the option of pulling in a rear wall so that the van awning can be completely closed. This means that you can explore your holiday destination in your vehicle during the day and leave your camping equipment such as chairs, tables and barbecue in your van awning at the campsite.

Rear tents for vans

With a rear tent, you gain a lot of usable space with headroom, right next to your vehicle. Use it for showering, changing, cooking or sleeping or simply as storage space for bicycles. The ideal solution for anyone who needs extra space quickly or has limited space on the campsite next to or behind the vehicle.

Escape

BRUNER
OUTDOOR IN MOTION

The newly developed, frameless rear tent Escape fits various identically constructed vehicle models: Peugeot Traveller, Citroën Spacetourer and Toyota Proace. Setting it up is child's play. The tent roof is simply placed over the tailgate and then fastened with magnetic strips and straps. The side walls are fixed in place with sewn-in magnetic strips. In the lower area, the flysheet is tensioned with numerous, replaceable guy ropes. This technique allows assembly without tools within a few minutes. The generous external mud flap with eyelets keeps rainwater out. Robust tensioning straps and numerous guy ropes give the tent a high wind stability. Incl. 30 cm plastic pegs and a large bag with compression straps. The bike carrier can remain mounted on the tailgate.

Front wall: can be rolled up completely, with large gauze window (closable with tinted film, blackout inside). Can be opened out as a sun canopy, 2 pitching poles included.

Side walls: can be fixed to the vehicle, can be tensioned tightly at the bottom. Right and left with tinted window, inside with blackout.

Material: 150D Oxford polyester

Scope of delivery: 2 pitching poles, tensioning material, transport bag, tent

Hydra

Westfield
Top Quality Concept

Accessories

3000 mm

The inflatable awning Hydra for vans or motorhomes offers optimum use of space thanks to its modified front air tube shape. You can fully use the floor space and have headroom in the entire roof area. A removable connector (not included in delivery) makes it easy to set up and take down the tent. Another advantage is that a low weight has to be pulled into the awning. Thanks to the air tube system, the air chambers are inflated in a short time. The supplied groundsheet offers maximum flexibility and can be attached to the awning with Velcro. With the help of the optionally available Drive-Away-Kit (610/262), the partial tent becomes freestanding and can be left at the campsite.

Connection Set Drive Away Kit

The universal Drive Away Kit with triple piping (7/7 mm or 5/7 mm) serves as a detachable connection between the vehicle and the awning. The piping tape is threaded into the piping rail of the vehicle.

610/262 29.95

Front wall and side walls with windows and ventilation flaps for perfect ventilation. Front door with panorama window and sun canopy function.

Mars

Tent depth: 250 cm

Mounting height: 245 – 260 cm

Advantages

Large windows

Sun canopy

Tinted windows

■ Airtube ■ 100 % PES polyester, double-sided PU coating

Mars

Start your holiday with the inflatable awning Mars with a depth of 250 cm. It fits perfectly and has the perfect width for your van. All window/door segments can be removed completely in a short time so that there are no barriers and you have a convenient sun canopy. The double mud flap and the permanent ventilation through the top ventilation make the van awning even more convenient.

Front wall: with two tinted window segments that can be folded down if required.

Side walls: each with a door and a tinted window gauze segment. These can also be interchanged if required.

Material: HydroTech Ripstop with polyurethane coating

Mounting height: 180 – 210 cm

Advantages

- BlackOut Bedroom™
- Easy to set up
- Large entrance area

i BlackOut Bedroom™ Technology

- Airtube, Steel
- 100 % PES polyester

Journeymaster Deluxe L

The Journeymaster Deluxe L is a spacious awning with BlackOut Bedroom™ sleeping cabins – the perfect companion for your next trip with your van. The awning is quick and easy to pitch thanks to its pre-assembled steel poles and air tubes, making it well-suited for a road trip with many stops. The integrated large windows let in light, but at the same time, the sleeping cabins equipped with BlackOut Bedroom™ technology guarantee a restful sleep. Thanks to this technology, up to 99 % of daylight is kept out of the sleeping areas.

Zodiac

The inflatable awning Zodiac is suitable for vans and motorhomes from 180 to 270 cm. With a weight of just 17.3 kg and a particularly small pack size, it is very easy to transport. Thanks to the two air tubes and three aluminium roof poles, the Zodiac can also be set up very quickly. The functional connector, which is available in three sizes, connects the freestanding inflatable awning to the vehicle. The connector is attached to the tent with a zip and to the vehicle with a piping. Alternatively, a connecting pole can be used or the connector can be tensioned over the vehicle using guy ropes. For maximum flexibility, there are two entrance doors in the connector that allow direct access to the vehicle. The Zodiac is equipped with large panorama windows, a door in the front wall and two side walls with mosquito nets.

Front wall and side walls: with windows and ventilation flaps for perfect ventilation. Can be folded down or removed if required.

Information

Would you rather sleep under the stars than in a hotel?

Would you like to be flexible when travelling and spontaneously escape the hustle and bustle of everyday life by car? For you, an overnight stay should be possible in almost any car park, at least in some countries?

Then comfortably sleeping in a roof tent on the roof of your car is just the thing for you.

The roof tents in our range can be attached to almost any vehicle (car, pick-up, mini-van, van, trailer). Only two cross struts are required as load carriers. Our range includes an inflatable roof tent with an extremely low weight and a small pack size. We also offer two pop-up roof tents with a manual mechanism or with remote control and electric operation. These also have a low weight and a small pack size. Thanks to their sophisticated design, they can be set up quickly and easily. The roof tents also offer enough space for single travellers, couples and families with small children.

Moonlight Tent

The roof tent for minivans and SUVs is ideal for a holiday in the middle of nature. The tent is attached on the roof rails, which must have a minimum load capacity of 75 kg and a usable width of at least 78 cm. The roof tent can be folded up quickly and easily and can also be used together with a wall awning. Version 140 offers space for 2 people, version 180 for 3 people. Both are equipped with fly screens and blackout blinds on all four sides, a rain cover, windows and YKK zips. The base consists of an aluminium plate with a honeycomb structure and the integrated mattress is 5 cm thick and consists of two types of foam with different thicknesses. You can easily reach the roof tent using the 2.30 m aluminium ladder (max. load capacity 150 kg). The waterproof cover protects against rain and the internal LED strip with adjustable light intensity provides suitable lighting. You can store your accessories neatly in the pockets.

The optional Privacy Moonlight Tent (075/810 or 075/811) provides even more privacy if required.

GENTLE TENT

The GT Roof tent has large windows with mosquito nets on all sides and impresses with a wonderful, airy all-round view. The spacious interior is incredibly comfortable. The enormous room height and the material used give you a luxurious feeling of space and ensure an excellent interior climate without condensation.

The GT Roof impresses with its legendary storm stability and is equipped with a UV-stable outer cover in the roof area. This cover protects against the sun and bad weather and increases the durability of the tent. For very cold temperatures, a further cover for the side parts is included in the scope of delivery.

With a sleeping area of 140 x 220 cm, there is enough space for 2 – 3 people.

TRT120E

DOMETIC
OUTDOOR

Experience your outdoor adventure even more intensively with the Dometic TRT120E roof tent. The tent is equipped with a 5 cm thick mattress made of high-density foam, which offers enough space for two people. Specially designed for outdoor use, the tent consists of a two-layer construction that is suitable for even the most remote locations in winter. The robust design is additionally reinforced by a waterproof PVC tent cover with UV protection factor UPF 50+ and can withstand almost anything. The double-layered windows with integrated fly screen let plenty of fresh air into the tent while keeping insects out. The frame is made of lightweight aluminium alloy. Setting up the TRT120E is very easy and done in minutes thanks to the 12 V operation and a wireless remote control.

Scope of delivery: roof tent; telescopic alloy ladder; PVC tent cover; RF remote control; 12 V plug with 5 m cable; tool bag with fastening material.

- Aluminium profile frame

■ Aluminium ■ 100 % recycled PET, Oxford Polyester

i polyester part made from rPET polyester from plastic bottles 

▶ info video

Yano

The Yano roof tent with its low weight of approx. 38 kg leaves nothing to be desired in terms of features. The material is a 180 g/m² recycled Ripstop TC (cotton blend fabric made of 65 % polyester and 35 % cotton). The tent has excellent ventilation and many other well thought-out details, such as a storage pocket for shoes and a window for a view of the starry sky. The roof tent can be attached in a few steps with the help of a roof rack and can thus be mounted independently of the vehicle. A comfortable TPU air mattress, an extension ladder and a protective cover are included. This tent is completely PVC-free and one of the lightest roof tents on the market. Despite the simple construction, it offers a lot of sleeping comfort. Thanks to the patten guard, which you can attach to the tent from the outside in case of rain, you will have a quieter night inside the tent.

Scope of delivery: car roof tent incl. frame, protective cover, shoe box, inflatable mattress with cotton cover (in the tent), telescopic aluminium ladder, patten guard/sun protection, fastening set, assembly instructions.

Colour: brown; Material: with PU coating, 100 % cotton blend fabric;
 Dim. (LxWxH): 212 x 150 x 147 cm

Canvas Awning for Yano

The Yano canvas awning is the perfect addition to the roof tent Yano. It offers plenty of space to relax in the shade at warm, sunny places and also protects your equipment when it rains. The canvas awning is fixed to the frame with velcro straps, tensioned with straps and set up variably in height and according to your needs using the pitching poles supplied. This ensures a dry and protected passage to the roof tent and a dry shelter for your meals.

Colour: brown; Material: 100 % recycled PET, Oxford Polyester; Dim. (LxWxH): 370 x 490 x 0.3 cm; Pack size: 97 x 14.5 x 14.5 cm; Weight: 4.7 kg **075/580 299.00**

For a shaded space in front of your motorhome, caravan or van!

Information

Sun canopies are perfect for travelling. They are usually easy to assemble with just a few poles. The material and design are decisive for the different uses. There are pure sun canopies that are extremely light but offer no protection from the rain.

The sun canopies can be customised partially or to the entire length of the vehicle. They can be supplemented with side walls or a front wall.

High-quality canopies offer protection from rain and wind. They can be attached wherever there is a piping rail – not just on the entrance side. Vario models fit on vehicles and can also be attached to existing awnings. There is the option of fitting eyelets on the canopy for the awning poles.

Robust materials

Sun canopies are usually made of plastic, which has the advantage that – unlike cotton – it does not rot. In addition, the fabric properties of some of the sun canopies make them very tear-resistant. The transport weight is also very low for sun canopies with side sections and a front wall.

This is an advantage, as the permissible total weight of the vehicle is limited. The vehicle load capacity is a major issue because anyone who exceeds it during traffic checks will pay severe penalties and may receive penalty points.

Sun canopies

A sun canopy makes for an enjoyable holiday!

Functionality and design

When making your choice, it is not just the functionality that is important, but also the look. The colour of the sun canopy should match the vehicle, be it monochrome or multi-coloured. Most vehicles already have the right preparation in the form of piping rails.

Due to their design, these rails run at the transition between the vehicle wall and roof, at least on the entrance side or above the windows. The longitudinal opening on the rail profile is then the guide for the sun canopy.

Canopy Shady Pro

The sun canopy Canopy Shady Pro is made in Germany and can be directly attached to caravans or to the models Galaxy, Pluto, Pluto XL, Ceres and Vega (model series from 2023 on). With a depth of 220 cm and the high-quality HydroTech® Ripstop material, the Canopy Shady Pro reliably protects you from the sun and the rain. Thanks to the three steplessly height-adjustable poles and four guy ropes, the Canopy Shady Pro is set up quickly and easily. The sun canopy is available in different sizes, each with a depth of 220 cm.

Material: double-sided PVC coating, 100 % PES polyester

Scope of delivery: tensioning material, sun canopy, poles

Event Shelter Air L

Pavillon

- ✓ Advantages
- Water-repellent
- UV-resistant
- Quick to set up

■ Airtube ■ 100 % PES polyester ■ UV 50+

Event Shelter Air L

The Event Shelter Air L by Coleman® can be set up quickly and easily by just one person and is a smart option for families who want to spend a longer holiday at a campsite. The spacious shelter can be set up in just a few minutes thanks to the single inflator point system. All you need to do is attach the supplied pump to the valve on the Event Shelter Air. The incoming air is then quickly distributed in the individual arch poles and thus throughout the entire shelter. As soon as the shelter is fully inflated and the valve is closed, the clips included in the scope of delivery allow the individual air tubes to be separated from each other. In this way, in the event of a small leak, it can be ensured that the air only escapes from the affected arch pole and not from the entire shelter. The Event Shelter Air L is equipped with Coleman® UV protection, which increases the durability of the fabric.

Information

Camping has a long tradition for us humans. However, the way we camp has changed in many respects. Take accessories, for example. Hardly any wishes remain unfulfilled and many useful items are offered by our specialist retailers, who can help you make the right choice with expert advice.

Accessories are all about things that "make life easier", about safety and care, but also about design – be it awning floors made of simple tarpaulin material or solid floors that give your awning the character of a home, energy-saving LED lighting for self-sufficient systems, lighting technology for the ambience in the awning, strong tent pegs or the right additional poles.

Awning Poles

Poles Barcelona

Awning poles in steel or aluminum with VD tensioning pole.

steel ø 25 mm	610/058-1	229.00
aluminium ø 28 mm	610/059-1	295.00

Poles Prestige/Bodensee

Suitable for: Prestige and Bodensee.

steel ø 25 mm	610/069	195.00
aluminium ø 28 mm	610/069-1	299.00

Universal Poles

Suitable for: sun canopy Stella.

steel ø 25 mm	610/360	189.00
aluminium ø 28 mm	610/365	265.00

Standard Steel Poles

Steel poles ø 25 mm with GripStop system. The pole locks when pressing it together without any damage. Very easy to use. **Suitable for:** Lux.

Weight: 15.6 kg	610/063	239.00
-----------------	----------------	---------------

Storm Straps

Storm Strap Set Frankana Freiko

Tensioning is provided by a strong tension spring that regulates the tension of the strap while an iron ground spike ensures the necessary hold. On storm roofs without an overhang, the eyelet of the strap is placed on the spike of the tent poles.

Set: 2 straps with eyelets (length: 280 cm), 2 relief springs, buckles, abrasion protection and 2 pegs.

Suitable for: Lux, Prestige, Jubilee, Rhön DC and Feldberg. **070/926 52.50**

Storm Strap Set

The set consists of two heavy fabric straps, spiral springs and robust anchor pegs. This storm strap set keeps the tent firmly anchored even in strong winds. The spiral springs equalise movements and thus protect the flysheet and poles.

Suitable for: Garmisch, Allgäu, Grönland, Finnland, Meira, Friesland and Weser.

070/927 44.95

Storm Strap Set

Universal storm strap for tents and awnings.

Consists of 2 straps with a length of 11.5 m and 1.5 m respectively, 1 strong spiral spring and 2 extra strong pegs. **610/207 19.95**

NEW

Storm Strap

Storm strap for 5.5 mm piping rail, awning and canvas awning incl. elastic strap as spring part and universal peg module (green).

Extension Eris Premium

The extension Eris is quick and easy to set up and creates extra living space in your awning! No matter whether you are sleeping in it or use it as a kitchen or storage tent, Eris offers a variety of possibilities. The door and the tinted windows with privacy function create optimum light conditions and always give you a perfect view. The height of 180 cm offers headroom and leaves nothing to be desired. A double zip allows you to use the existing side wall of your inflatable awning as a partition or room divider. The supplied roof poles ensure optimum tension in the roof.

Material: HydroTech® CottonTouch

Suitable for Pluto 2.0, Pluto XL 2.0, Vega 2.0, Galaxy 2.0, Neptune 2.0 and Orion 2.0.

Scope of delivery: tensioning material, Airtube, roof pole, mosquito net, transport bag, tent

Awning Carpet Starlon

The Starlon awning carpet is available in blue and grey and therefore perfectly matches your Dorema awning. Thanks to the special fabric structure and the use of high-quality, flexible and durable plastic, the Starlon is particularly light and feels pleasant when walking barefoot. The carpet easily adapts to any surface, folds compactly and is easy to clean – even coffee or wine stains can be easily removed with a damp cloth. As the fabric structure is air-permeable, no unpleasant odours can form under the carpet.

The Global Harmonized System (GHS) for the EU | Classification and Labelling according to Regulation (EG) No. 1272/2008 (CLP-VO)

Hazard and Precautionary Statements

Source: www.baua.de

Please observe the application instructions and safety data sheets for products with hazard labels.

Dangers, additional hazards and marking elements, coding and wording.

H200 Codes: Physical hazards

H226 Flammable liquid and vapour.

H300 Codes: Health hazards

H315 Causes skin irritation.

H319 Causes serious eye irritation.

H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled.

H335 May cause respiratory irritation.

H373 May cause damage to organs (state all organs affected, if known) through prolonged or repeated exposure (state route of exposure if there is conclusive evidence that no other routes of exposure cause the hazard).

Supplemental labelling elements

EUH204 Contains isocyanates. May cause an allergic reaction.

GHS02		Flammable
GHS07		Health hazard
GHS08		Serious health hazard

An overview of all precautionary and hazard statements as well as labelling elements can be found on the website of the Federal Institute for Occupational Safety and Health (Bundesanstalt für Arbeitsschutz und Arbeitsmedizin): www.baua.de/EN/Home/Home_node.html.

Joy, innovation and quality are the foundations of a 60-year history of growth. The extensive range offers specific products for outdoor, leisure and touring.

After 120 years, there is Coleman equipment for everything – hiking, days at the lake, camping or music festivals.

Dometic is an international company with a long history of providing market-leading products for outdoor, home and professional use.

EUROTRAIL has been fulfilling the wishes of campers for years and offers an extensive range of camping products for every holiday!

Fiamma stands for a sustainable lifestyle and contact with nature. The large Fiamma range ensures that you feel safe and secure wherever you are.

GENTLE TENT

GentleTent is a start-up from Vienna that specialises in inflatable tent systems. With its own ideas and developments, it is the inflatable tent pioneer on the camping market.

GÜSTO Zeltmanufaktur has been producing individual and customised quality awnings "Made in Germany" for over 85 years – each awning is unique.

Hahn-Zelte produces classic awnings. It is particularly strong when it comes to all-season awnings. Its collection is characterised by the highest quality equipment.

The company's outstanding reputation and success are based on its strong sense of family and the desire to inspire families to discover and enjoy the outdoor life for themselves.

At StarCamp, a Dorema product line, you will find inflatable tents at a very good price-performance ratio. We stock exclusive models from this product line.
